

EIA PRODUCTION SOURCE CODE — 1986

Code symbols assigned to radio-television manufacturers and suppliers, arranged both alphabetically by companies and numerically by code number.

Reproduced with the permission of
ELECTRONICS INDUSTRIES ASSOCIATION
2001 Eye Street, N.W., Washington, D.C. 20006

Indianapolis, Indiana 46206

EIA SOURCE CODE AND DATE BOOK**1. What is the EIA Source Code?**

It is a numeric symbol, assigned and registered by EIA Headquarters, which may be stamped or marked on any or all products to identify the production source or the vendor assuming product responsibility.

The EIA code, in addition, provides for adding numerals to the source code symbol to identify the year and week of production.

2. How does the date code work?

In addition to a source code, it may be desired to identify the date of production. This can be done by adding, following a hyphen (-) the last two digits of the production year plus the number of the week of that year.

A hypothetical example of the application of the EIA date code to the source code follows: Say a company is assigned the source code symbol 112. To this is added two digits for the year - such as "86" for the current year, or "87" for 1987 - and another two digits for the week of the year. Thus the combined source and date codes would be, in this case:

112-8610

which would represent the company's number "112" plus "86" for 1986, the production year, and "10" for the week of March 2-8, the production week. For convenience in identifying the week, date code tables in the back of this booklet give the number of each week in both 1986 and 1987.

If a component manufacturer is unable to use the four-digit date code, an alternate three-digit code may be used by taking only the last digit of the year. The example above would then become:

112-610

3. To whom is the EIA service available?

To all manufacturers of radio-television and electronic equipment or components. This service is extended to all EIA members without charge. For non-members an annual registration fee of \$30.00 is charged.

ALPHABETICAL LIST

EIA CODE SYMBOLS

January 1, 1986

(*indicates non-members)

*3M Company, Electronic Products Division St. Paul, MN	681
*Acacia Sales, Sunnyvale, CA	748
*Academy Electronics, Bensenville, IL	1174
*Ace Transformer, Chicago, IL	884
*Acme Coil & Transformer Corp., Chicago, IL	928
*Acme Electric Corp., Cuba, NY	413
*Acoustic Fiber Sound Systems, Inc., Indianapolis, IN	1113
*A.C.R. Electronics, Inc. Lynn, MA	83
*Actown-Electrocoil, Inc., Libertyville, IL	1108
*Acushnet Capacitor Co., New Bedford, MA	950
Admiral Group/Rockwell International, Corporation, Schaumburg, IL	101
*Adronics, Inc., Cedar Grove, NJ	387
*Ad-Vance Magnetics, Inc., Rochester, IN	21
Advance Transformer Co., Chicago, IL	1095
*Advanced Semiconductor, Inc., N. Holly- wood, CA	66
Aerovox, Inc., New Bedford, MA	1238
*Aguirre Electronic Co., Chicago, IL	1231
AIE Magnetics, Div. of Vernitron, Nash- ville, TN	689

A SUMMARY OF THE EIA STANDARDIZATION PROGRAM

The EIA Engineering Department operates in a comprehensive standardization program as evidenced by over 600 standards and publications currently available through EIA. These documents have been prepared and revised by more than 5,000 industry and government representatives who participate on the Engineering Department's 275 Committees.

EIA standards development activity is conducted through Panels, Committees and Working Groups made up of interested persons from EIA member and non-member companies, government, the academic community, and others. Following Committee and public review and comment, and review by the Engineering Department Executive Committee, the document is published as an official EIA Standard and made available through sale by the Association's Standards Sales Office.

50	December 7	thru	December 13	inc.
51	December 14	thru	December 20	inc.
52	December 21	thru	December 27	inc.

Many EIA Standards become American National Standards through ANSI approval, and many form the basis of U.S. positions in international standards development in the IEC and ISO.

EIA has developed and issued Standard RS-476 on Source and Date Code Marking. This Standard outlines requirements for source and date code marking on electronic components and describes the assignment of component manufacturer identification numbers and their sequence on the component to be marked, along with the lot date code.

Other EIA Standards and publications are listed in a Catalog of EIA and JEDEC Standards and Engineering Publications which are available upon request to the EIA Engineering Department, 2001 Eye Street, N. W., Washington, D. C. 20006. (202) 457-4966.
